

U.S. Global GO GOLD and Precious Metal Miners ETF  
 Trading Symbol: GOAU  
 Listed on: NYSE Arca

**Summary Prospectus**  
**June 14, 2017**

www.usglobletfs.com

Before you invest, you may want to review the U.S. Global GO GOLD and Precious Metal Miners ETF (the “Fund”) statutory prospectus and statement of additional information, which contain more information about the Fund and its risks. The current statutory prospectus and statement of additional information dated June 10, 2017, are incorporated by reference into this Summary Prospectus. You can find the Fund’s statutory prospectus, statement of additional information and other information about the Fund online at [www.usglobletfs.com/materials.html](http://www.usglobletfs.com/materials.html). You can also get this information at no cost by calling 1-800-617-0004 or by sending an e-mail request to [ETF@usbank.com](mailto:ETF@usbank.com).

**Investment Objective**

The U.S. Global GO GOLD and Precious Metal Miners ETF (the “Fund”) seeks to track the performance, before fees and expenses, of the U.S. Global Go Gold and Precious Metal Miners Index (the “Index”).

**Fees and Expenses of the Fund**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund (“Shares”). This table and the example below do not include the brokerage commissions that investors may pay on their purchases and sales of Shares.

**Annual Fund Operating Expenses**

*(expenses that you pay each year as a percentage of the value of your investment)*

<b>Management Fees</b>	<b>0.60%</b>
<b>Distribution and/or Service (12b-1) Fees</b>	<b>None</b>
<b>Other Expenses<sup>1</sup></b>	<b>0.00%</b>
<b>Total Annual Fund Operating Expenses</b>	<b>0.60%</b>

<sup>1</sup> “Other Expenses” are based on estimated amounts for the current fiscal year.

**Expense Example**

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5 percent return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

<b>1 Year</b>	<b>3 Years</b>
\$61	\$192

**Portfolio Turnover**

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund’s performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

## Principal Investment Strategy

The Fund uses a “passive management” (or indexing) approach to track the performance, before fees and expenses, of the Index. The Index is composed of the exchange-listed common stock (or American Depositary Receipts (“ADRs”)) of U.S. and international (including emerging markets) companies that earn at least 50 percent of their aggregate revenue from precious metals (“Precious Metals Companies”). Precious metals consist of gold, silver, platinum, and palladium. The Index may include small-, mid-, and large-capitalization companies.

### *U.S. Global Go Gold and Precious Metal Miners Index*

The Index universe consists of the common stock or ADRs of Precious Metals Companies across the globe that earn at least 50 percent of their aggregate revenue from precious metals through active (i.e., mining or production) or passive (i.e., owning royalties or production streams) means. The universe of Precious Metals Companies is screened for investibility (e.g., must be listed on a securities exchange) and liquidity (minimum average daily value traded). Precious Metals Companies that rely primarily on debt to finance their business are eliminated from the Index. To qualify for inclusion in the Index, Precious Metals Companies must have their common stock or a sponsored ADR listed on an exchange in Australia, Canada, Hong Kong, South Africa, the United Kingdom, or the United States. As described below, at the time of each rebalance of the Index, at least 30% of the Index will be allocated to Precious Metals Companies whose stock is listed on an exchange in the United States or Canada and that earn a majority of their revenue from gold and silver, and the top three such companies will each receive a 10% Index allocation.

The Index is composed of four “tiers” of Precious Metals Companies based on certain fundamental factors, their country of listing, and other criteria described in the table below. Each tier will first be populated with Precious Metals Companies having revenue per employee that is greater than the median for companies whose revenue per employee is in the top 20<sup>th</sup> percentile of the Index universe (“Priority Companies”) before other Precious Metals Companies are eligible to be included in the Index. Each Precious Metals Company included in the Index universe receives a composite score based on multiple fundamental factors. Composite scores for Priority Companies are based on their revenue per employee, operating cash flow per employee, and gross margin, and scores for other companies are based primarily on their operating-cash-flow-to-enterprise-value ratio.

Tier 1 (30%)	The three highest-scoring Precious Metals Companies that (i) derive a majority of their revenue from silver or gold, (ii) have their common stock listed on an exchange in the United States or Canada, and (iii) have a market capitalization of at least \$1 billion are individually weighted at 10%.
Tier 2 (20%)	The next five highest-scoring Precious Metals Companies that (i)(a) have their common stock listed on an exchange in the United States or Canada or (b) have a U.S.-listed ADR and have their common stock listed on an exchange in Australia, South Africa, or the United Kingdom, and (ii) have a market capitalization of at least \$400 million are individually weighted at 4%.
Tier 3 (30%)	The next ten highest-scoring Precious Metals Companies that (i)(a) have their common stock listed on an exchange in the United States or Canada or (b) have a U.S.-listed ADR and have their common stock listed on an exchange in Australia, South Africa, or the United Kingdom, and (ii) have a market capitalization of at least \$300 million are individually weighted at 3%.
Tier 4 (20%)	The next ten highest-scoring Precious Metals Companies that (i) have their common stock listed on an exchange outside of the United States or Canada and (ii) have a market capitalization of at least \$200 million are individually weighted at 2%.

The Adviser generally expects the Index to include approximately 28 Precious Metals Companies with the highest composite scores. The Index is rebalanced and reconstituted quarterly.

The Index was developed by U.S. Global Indices, LLC (the “Index Provider”), a wholly-owned subsidiary of U.S. Global Investors, Inc. (the “Adviser”), in 2017 in anticipation of the commencement of operations of the Fund and is constructed using an objective, rules-based methodology.

The Index calculation agent is Indxx, LLC, which is not affiliated with the Fund, the Adviser, the Index Provider, or the Fund's distributor. The Index calculation agent provides information to the Fund about the constituents of the Index and does not provide investment advice with respect to the desirability of investing in, purchasing, or selling securities.

#### *The Fund's Investment Strategy*

The Fund attempts to invest all, or substantially all, of its assets in the component securities that make up the Index. Under normal circumstances, at least 80 percent of the Fund's total assets (exclusive of any collateral held from securities lending) will be invested in the component securities of the Index and depositary receipts representing component securities. The Adviser expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will be 95 percent or better.

The Fund will generally use a "replication" strategy to achieve its investment objective, meaning it generally will invest in all of the component securities of the Index. However, the Fund may use a "representative sampling" strategy, meaning it may invest in a sample of the securities in the Index whose risk, return and other characteristics closely resemble the risk, return and other characteristics of the Index as a whole, when the Adviser believes it is in the best interests of the Fund (e.g., when replicating the Index involves practical difficulties or substantial costs, an Index constituent becomes temporarily illiquid, unavailable or less liquid, or as a result of legal restrictions or limitations that apply to the Fund but not to the Index).

The Fund generally may invest up to 20 percent of its total assets (exclusive of any collateral held from securities lending) in securities or other investments not included in the Index, but which the Adviser believes will help the Fund track the Index. For example, the Fund may invest in securities that are not components of the Index to reflect various corporate actions and other changes to the Index (such as reconstitutions, additions, and deletions).

To the extent the Index concentrates (i.e., holds more than 25 percent of its total assets) in the securities of a particular industry or group of related industries, the Fund will concentrate its investments to approximately the same extent as the Index. As of the date of this Prospectus, the Index was concentrated in the metals and mining industry.

To the extent the Index has significant exposure to certain geographic regions, the Fund will have approximately the same exposure. The Adviser expects that the Index, and consequently the Fund, will generally have significant exposure to investments in Africa and Canada.

### **Principal Investment Risks**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share ("NAV"), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the section in the Fund's Prospectus, titled "Additional Information About the Fund—Principal Investment Risks."

- **Concentration Risk.** The Fund may be susceptible to an increased risk of loss, including losses due to adverse occurrences affecting the Fund more than the market as a whole, to the extent that the Fund's investments are concentrated in the securities of a particular issuer or issuers, country, group of countries, region, market, industry, group of industries, sector, or asset class.
- **Currency Exchange Rate Risk.** The Fund's assets may include investments denominated in non-U.S. currencies or in securities that provide exposure to such currencies. Changes in currency exchange rates and the relative value of non-U.S. currencies will affect the value of the Fund's investment and the value of your Shares. Currency exchange rates can be very volatile and can change quickly and unpredictably. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money.
- **Depositary Receipt Risk.** Depositary Receipts involve risks similar to those associated with investments in foreign securities and certain additional risks. Depositary Receipts listed on U.S. exchanges are issued by banks or trust companies, and entitle the holder to all dividends and capital gains that are paid out on the underlying foreign shares ("Underlying Shares"). When the Fund invests in Depositary Receipts as a substitute for an investment directly in the Underlying Shares, the Fund is exposed to the risk that the

Depository Receipts may not provide a return that corresponds precisely with that of the Underlying Shares.

- **Emerging Markets Risk.** The Fund may invest in companies organized in emerging market nations. Investments in securities and instruments traded in developing or emerging markets, or that provide exposure to such securities or markets, can involve additional risks relating to political, economic, or regulatory conditions not associated with investments in U.S. securities and instruments or investments in more developed international markets. Such conditions may impact the ability of the Fund to buy, sell or otherwise transfer securities, adversely affect the trading market and price for Shares and cause the Fund to decline in value.
- **Equity Market Risk.** The equity securities held in the Fund's portfolio may experience sudden, unpredictable drops in value or long periods of decline in value. This may occur because of factors that affect securities markets generally or factors affecting specific issuers, industries, sectors or companies in which the Fund invests. Common stocks are generally exposed to greater risk than other types of securities, such as preferred stock and debt obligations, because common stockholders generally have inferior rights to receive payment from issuers.
- **Foreign Securities Risk.** Investments in non-U.S. securities involve certain risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability. Investments in non-U.S. securities also may be subject to withholding or other taxes and may be subject to additional trading, settlement, custodial, and operational risks. These and other factors can make investments in the Fund more volatile and potentially less liquid than other types of investments.
- **Geographic Investment Risk.** To the extent the Fund invests a significant portion of its assets in the securities of companies of a single country or region, it is more likely to be impacted by events or conditions affecting that country or region.
  - **Africa-Specific Risk.** Because investments in the metals and mining industry may be geographically concentrated in companies that have a significant presence in Africa, investment results could be dependent on the financial, political, and social climate of the African countries in which these companies operate. The African economy is diverse, and certain African markets are in the early stages of development, with less liquidity and more capital market restrictions compared to developed markets. In addition, many countries in Africa have long histories of political, social, and economic instability and, as a result, have suffered from expropriation and/or nationalization of assets, confiscatory taxation, authoritarian and/or military involvement in governmental decision-making, armed conflict, negative impacts on the economy as a result of civil war, and religious, ethnic and/or socioeconomic unrest and, in certain countries, genocidal warfare. Because African markets are heavily dependent on the exportation of natural resources, they may be negatively impacted by changes in commodity prices. Changes in spending on African products by the economies of other countries or changes in any of these economies may cause a significant impact on the African economy.
  - **Canada-Specific Risk.** Because investments in the metals and mining industry may be geographically concentrated in Canadian companies or companies that have a significant presence in Canada, investment results could be dependent on the financial condition of the Canadian economy. The Canadian economy is reliant on the sale of natural resources and commodities, which can pose risks such as the fluctuation of prices and the variability of demand for exportation of such products. Changes in spending on Canadian products by the economies of other countries or changes in any of these economies may cause a significant impact on the Canadian economy.
- **Gold and Precious Metals Risk.** The Fund will be sensitive to changes in, and its performance will depend to a greater extent on, the overall condition of the metals and mining industry. Competitive pressures may have a significant effect on the financial condition of companies in such industry. Also, such companies are highly dependent on the price of certain precious metals. These prices may fluctuate substantially over short periods of time, so the Fund's Share price may be more volatile than other types of investments. The prices of precious metals rise and fall in response to many factors, including: economic

cycles; changes in inflation or expectations about inflation in various countries; interest rates; currency fluctuations; metal sales by governments, central banks, or international agencies; investment speculation; resource availability; fluctuations in industrial and commercial supply and demand; government regulation of the metals and materials industries; and government prohibitions or restrictions on the private ownership of certain precious and rare metals. The Index measures the performance of equity securities of Precious Metals Companies and does not measure the performance of direct investment in precious metals. Consequently, the Fund's Share price may not move in the same direction and to the same extent as the spot prices of precious metals.

- **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.
- **No Operating History.** The Fund is a recently organized, non-diversified management investment company with no operating history. As a result, prospective investors have no track record or history on which to base their investment decision.
- **Passive Investment Risk.** The Fund is not actively managed and the Adviser would not sell shares of an equity security due to current or projected underperformance of a security, industry or sector, unless that security is removed from the Index or the selling of shares of that security is otherwise required upon a reconstitution of the Index in accordance with the Index methodology.
- **Shares May Trade at Prices Other Than NAV.** As with all ETFs, Shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the Shares will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly, including due to supply and demand of Shares and/or during periods of market volatility. Thus, you may pay more (or less) than NAV intra-day when you buy Shares in the secondary market, and you may receive more (or less) than NAV when you sell Shares in the secondary market. This risk is heightened in times of market volatility, periods of steep market declines, and periods when there is limited trading activity for Shares in the secondary market, in which case such premiums or discounts may be significant. Because securities held by the Fund trade on foreign exchanges that are closed when the Fund's primary listing exchange is open, there are likely to be deviations between the current price of an underlying security and the security's last quoted price from the closed foreign market. This may result in premiums and discounts that are greater than those experienced by domestic ETFs.
- **Smaller-Companies Risk.** The Fund may invest in the securities of smaller-capitalization companies. As a result, the Fund may be more volatile than funds that invest in larger, more established companies. The securities of smaller-capitalization companies generally trade in lower volumes and are subject to greater and more unpredictable price changes than larger capitalization stocks or the stock market as a whole. Smaller-capitalization companies may be particularly sensitive to changes in interest rates, government regulation, borrowing costs and earnings.
- **Tax Risk.** To qualify for the favorable tax treatment generally available to regulated investment companies, the Fund must satisfy certain diversification requirements. Given the concentration of the Index in a relatively small number of securities, it may not always be possible for the Fund to fully implement a replication strategy or a representative sampling strategy while satisfying these diversification requirements. The Fund's efforts to replicate or represent the Index may cause it inadvertently to fail to satisfy the diversification requirements. If the Fund were to fail to satisfy the diversification requirements, it could incur penalty taxes and be forced to dispose of certain assets, or it could fail to qualify as a regulated investment company. If the Fund were to fail to qualify as a regulated investment company, it would be taxed in the same manner as an ordinary corporation, and distributions to its shareholders would not be deductible by the Fund in computing its taxable income.
- **Tracking Error Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio

transaction costs not incurred by the Index. In addition, the Fund may not be fully invested in the securities of the Index at all times or may hold securities not included in the Index.

## **Performance**

The Fund is new and therefore does not have a performance history for a full calendar year. In the future, performance information for the Fund will be presented in this section. Performance information is also available on the Fund's website at [www.usglobletfs.com](http://www.usglobletfs.com).

## **Management**

### *Investment Adviser*

U.S. Global Investors, Inc. serves as investment adviser to the Fund.

### *Portfolio Managers*

The Fund is managed by a team consisting of the following individuals:

Frank E. Holmes, Chief Executive Officer and Director for the Adviser, has been a portfolio manager of the Fund since its inception in 2017.

Ralph P. Aldis, CFA, a Portfolio Manager for the Adviser, has been a portfolio manager of the Fund since its inception in 2017.

## **Purchase and Sale of Shares**

Shares are listed on the NYSE Arca, Inc. (the "Exchange"), and most investors will buy and sell Shares through brokers at market prices, rather than NAV. Because Shares trade at market prices rather than NAV, Shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems Shares at NAV only in large blocks known as "Creation Units," which only Authorized Participants ("APs") (typically, broker-dealers) may purchase or redeem. Creation Units generally consist of 50,000 Shares, though this may change from time to time. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund (the "Deposit Securities") and/or a designated amount of U.S. cash.

## **Tax Information**

Fund distributions are generally taxable as ordinary income, qualified dividend income, or capital gains (or a combination), unless your investment is in an individual retirement account ("IRA") or other tax-advantaged account. Distributions on investments made through tax-deferred arrangements may be taxed later upon withdrawal of assets from those accounts.

## **Financial Intermediary Compensation**

If you purchase Shares through a broker-dealer or other financial intermediary (such as a bank) (an "Intermediary"), the Adviser or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary's website for more information.
